After the successful 356 Porsche introduced the new shaped 911 in 1965 but this was expensive. Porsche's answer was to put the engine from the 356 in to the 911 body and call it the 912; this came towards the end of 1965 when 356 production was phased out. Generally speaking all running changes made to the 911 were made to the 912 at the same time. The 912 was phased out at the end of 1969 to make way for the 914. The 912 was brought back in 1976 with a 4 cylinder engine and called a 912E.

This is a book of contemporary road and comparison tests, specification and technical data, new model introductions, development, long-term appraisals, owner's survey, retrospective.

Models covered include:

• Targa

• CoupT

• 912E
